Summary

B.Tech Computer Science graduate (2026) focused on software development, with interests in Software Engineering, Full Stack Development, and AI Engineering. Comfortable with JavaScript and the MERN stack, while practicing DSA using Java and exploring AI concepts such as LLMs with Python. Enjoy building applications, solving problems, and exploring new technologies through hands-on learning.

Technical Skills

Languages: JavaScript (ES6+), Java, Python, SQL
Frontend: HTML5, CSS3, React.js, TailwindCSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Databases: MongoDB
AI / LLM (learning): LLM APIs (OpenRouter), tool calling, multimodal analysis, Gradio
Concepts: Object-Oriented Programming, Data Structures and Algorithms
Data & ML (basic): Pandas, NumPy, Scikit-learn, Streamlit, Matplotlib
Tools: Git, GitHub, Postman, VS Code

Projects

AgriMart – Agricultural Marketplace | *MongoDB, Express.js, React.js, Node.js, JWT, Razorpay* [GitHub] | [Live]
- Built a **bidirectional MERN marketplace** where farmers and suppliers can trade directly.
- Implemented **role-based access control** for 4 user roles, each with its own dashboard, secured with **JWT authentication**.
- Added a **six-language interface** using React Context and integrated Razorpay payments in test mode.
- Built an admin audit log that records administrative actions along with IP addresses.

MangaCraft – AI Manga Panel Assistant (V2 built; V3 in progress) | *Python, Gradio, OpenRouter, SQLite* [GitHub]
- Built a Gradio-based **AI agent** for manga artists using OpenRouter LLMs, with 7 tools the model picks via **tool calling**.
- Added multimodal panel and composition analysis, and reference-image generation, all through OpenRouter.
- Stored projects, conversations and **project-specific memory** in SQLite, isolated per project.
- Added streaming responses, rate limiting, conversation limits and error handling, with regression test scripts.

GramaCharitra – Village Heritage Platform | *React.js, Node.js, Express.js, MongoDB, JWT* [GitHub]
- Built a full-stack MERN application for preserving and exploring village histories, with an MVC backend, RESTful APIs and public read-only access to published content.
- Added an interactive commenting system and an admin panel for content management, protected with **JWT and bcrypt**.

Crime Data Analysis & Prediction | *Python, Pandas, NumPy, Scikit-learn, Streamlit* [GitHub] | [Live]
- Built a Streamlit app that forecasts crime trends across India using **Support Vector Regression (SVR)**.
- Cleaned historical Indian crime data with Pandas and NumPy and visualized geographic patterns as heatmaps.

Education

Vasireddy Venkatadri Institute of Technology (VVIT) Guntur, Andhra Pradesh
B.Tech, Computer Science and Engineering | *CGPA:* ***8.68/10*** *2022 – 2026*

Sri Chaitanya Junior College, Vijayawada | Class XII (BIEAP) | **94.5%** *2020 – 2022*

Sri Chaitanya Techno School, Vijayawada | Class X (SSC) | **99%** *2019 – 2020*

Certifications

Programming in Java (NPTEL / edX) | Google AI-ML Virtual Internship (EduSkills)

Creative Practice

Pencil and pen sketching of anime and manga characters since the second semester of B.Tech; currently exploring digital art and building visual composition skills and attention to detail.
